LAB 7: Fuzzing for Input Validation Bugs

Full Name	Ramith M R
SRN	PES1UG24CS367
Class / Section	5-F
Course Name	Software Engineering
Date of Submission	11/11/2026

SS1: Buggy Module Run

Command run `python car_insurance_premium_parser.py`

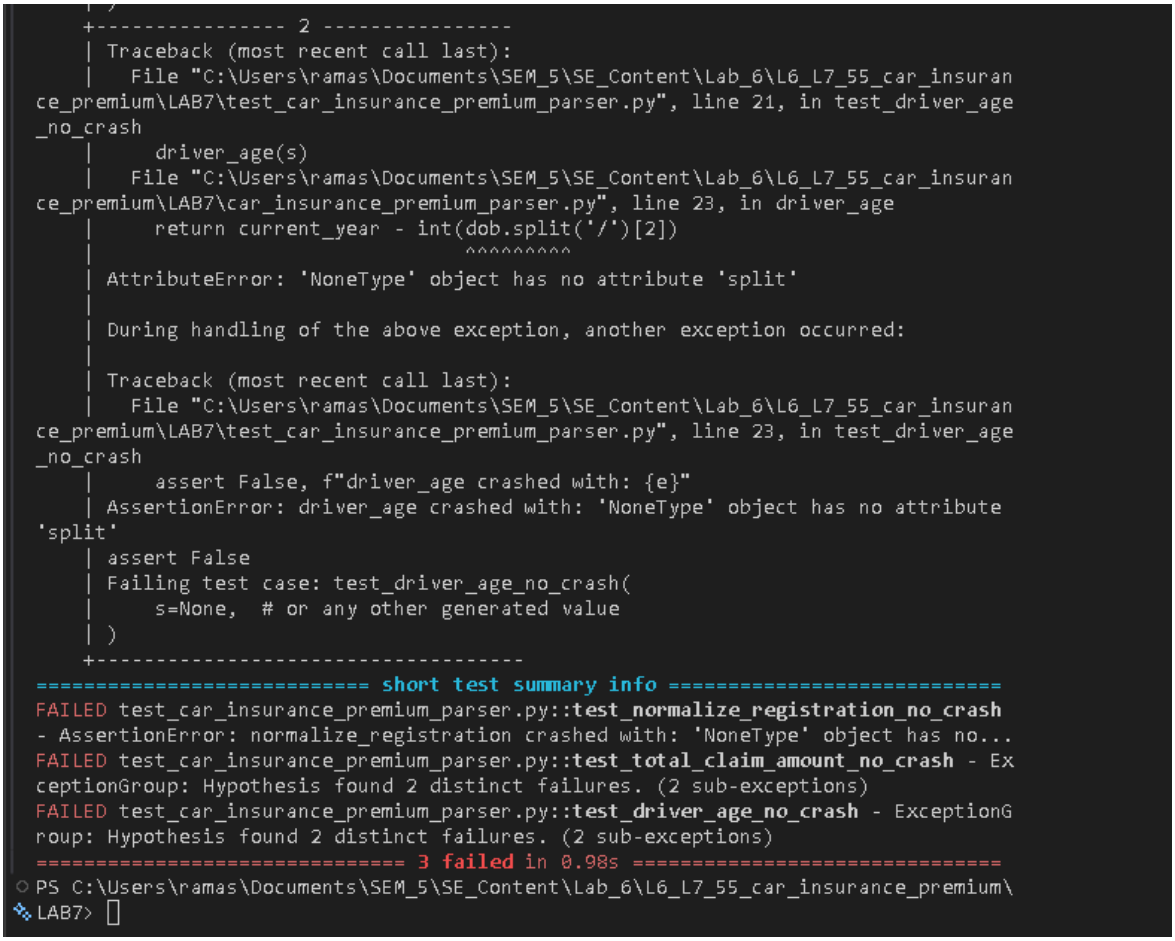

Shows: the output of the original, unfixed module on the sample inputs.

SS2: Tests Failing on the Buggy Module

Command run: `pytest test_car_insurance_premium_parser.py`

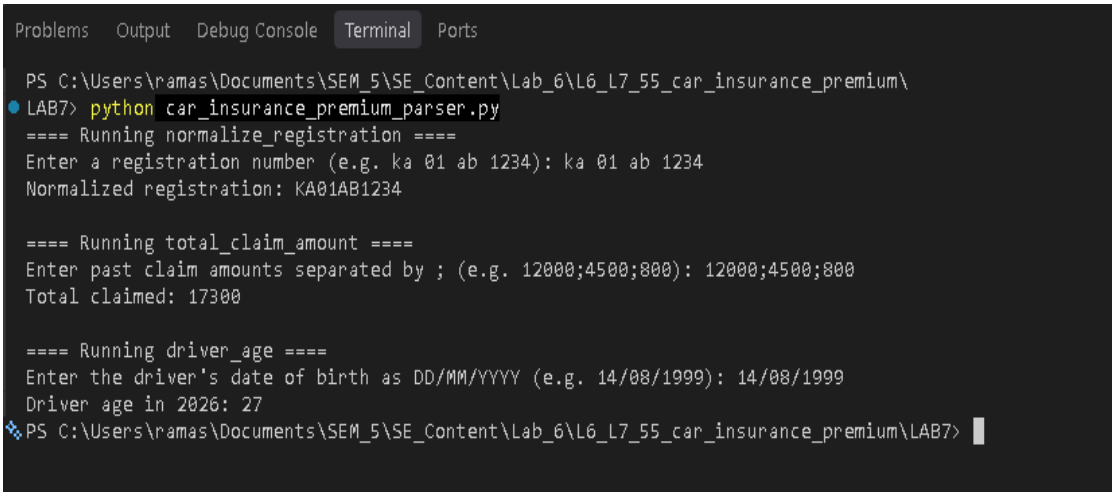

Shows: all three completed tests failing, with Hypothesis's falsifying examples.

SS3: Fixed Module Run

Command run: `python car_insurance_premium_parser.py`

Shows: the output of the fixed module on the same sample inputs as SS1.

SS4: Tests Passing on the Fixed Module

Command run: `pytest test_car_insurance_premium_parser.py`

Shows: all three tests passing on the fixed module.
